

# COMP PLAN (SHORT VERSION)

## RETAIL PAYOUT

The retail payout pays the difference between wholesale and retail price to you as the enroller of the retail or preferred customer.

## FIRST ORDER PAYOUT

The First Order payout pays on any first order that is not a pack.

	Level 1	Level 2
<i>Initial Order</i>	20%	5%

Example, if I have someone in my downline first level 1 purchases an initial order, then I will receive 20%. If someone on level 2 purchases an initial order, then I receive %5.

## FAST START PACK PAYOUT

The Fast Start payout pays on initial fast start packs

Payout on packs paid as follows:

		Level 1	Level 2
Pack 1	249	20%	5%
Pack 2	499	20%	5%
Pack 3	549	20%	5%

Example, if I have someone in my downline first level 1 purchases a Pack 1, then I will receive 20%. If someone on level 2 purchases a Pack 1, then I receive %5.

## BINARY PAYOUT

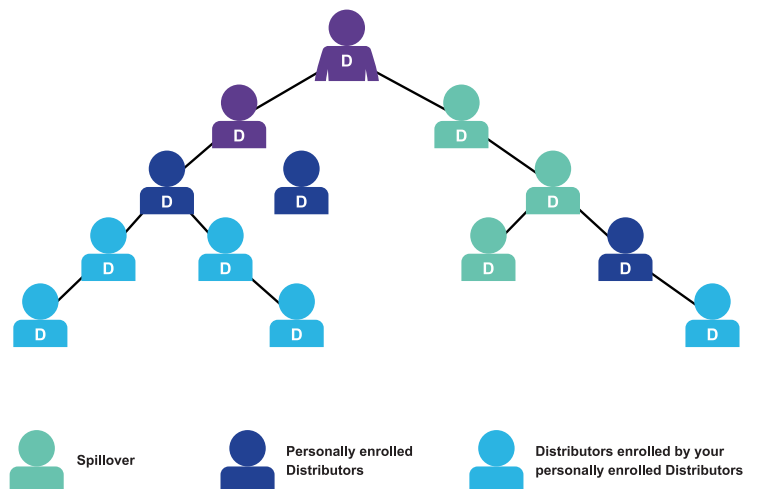

The binary payout pays on the commissionable volume. The binary volume comes from the full CV of reorders and all CV of retail sales orders and 50% of the CV of all pack purchases.

The binary payout pays 20% of pay leg (weak side) volume. After volume in the pay leg (weak side) has been paid on, the volume is flushed to zero from the pay leg and a corresponding amount flushed from the strong leg.

**Weekly Payout Cap:** See rank rules for bonus max amount per rank.

For example, if you had 1,000 in your strong leg and 800 in your pay leg (weak leg), you are paid 20% of your pay leg (weak leg) volume which is \$160. In this example, there is \$0 left in pay leg and \$200 the strong leg to carry over to the next week. You must be active to have carry over volume.
